

Unfolding a Grand Blueprint

In July 2024, the respected Comrade Kim Jong Un gave on-site guidance over the construction project in the city of Samjiyon, unfolding a grand blueprint for creating a new civilization for the people.

Making the rounds of several places in the city, he set forth important tasks for face-lifting Samjiyon into a newer, innovative cultured city in the light of the daily-growing requirements of the current reality.

The officials were deeply moved by his painstaking efforts for the good of the people.

Noting that the grand nature of the Mt Paektu area consisting of primeval forests and mountains is our proud, precious resource, Comrade Kim Jong Un underscored the need to successfully build a favourite tourist resort in the world-famous Mt Paektu area to be frequented by the Korean people and foreigners around the world.

Saying that it is necessary to develop mountain tourism into a highly promising industry in conformity with the natural and geographical features of the country, in which the mountain areas account for almost 80 % of the whole territory, he stressed that it is important to perfect legal and institutional mechanisms for protecting nature and environment.
